Feedback

Comments and questions about how the NView iEMS system software works are welcomed. Please review the FAQ in the related manual, and if your question is not covered, send email by using the following web page:

<http://www.raisecom.com/en/xcontactus/contactus.htm>.

If you have comments on the NView iEMS specification, instead of the web page above, please send comments to:

export@raisecom.com

We hope to hear from you!

License Notes

The license for NView iEMS is used to verify the legality of this software, and grants user with privilege to manage variety of Raisecom's products within authority restricted in this file.

1. Prerequisite

Before you license your NView iEMS system, pay attention to the following notes:

A. Trial license & authorized license

You are allowed to evaluate NView iEMS software intensively for a period of 30 days with trial license. To use the software after this period legally you need to buy authorized license.

B. Limitations

- ◇ The IP Address of your computer. **The authorized license allows use of NView iEMS software on computer whose IP Address is identical with that written in the license only, use of the software on other computer needs additional license** (so once you have purchased our NView iEMS product, the IP address of computer on which you'd like to install the software should be provided to us). **The application of trial license has no such limitation.**
- ◇ Any modifications to this license are not permitted. Otherwise the system would not startup normally.

If any of the limitations are not strictly complied, you will see the following prompt when attempt to import the license:

Thus, you have an invalid license, and cannot get access to the NView iEMS system.

2. How can I license my system?

When firstly start the License Admin or the License Server program, you need to import the valid License file into the system, otherwise the system could not startup. To do so, the following steps are needed:

- ◇ Import authorized License file;
- ◇ Start the License server, and make sure of its success.

You can opt to any of the ways to import the License file to your NView iEMS system (suppose you've installed both the NView iEMS platform and EMSs successfully):

Method 1: Take starting of the License Server program for example.

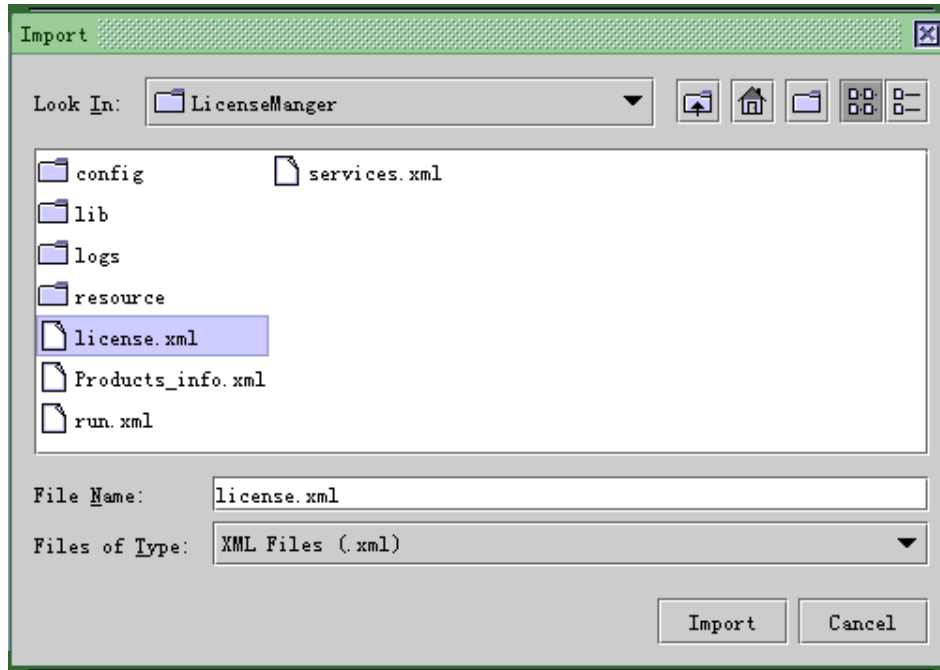

Click the [Start\Program\Raisecom NView\ LicenseManager \Start License Server] in Start menu of Windows to start the License Server program. If there is no License file or the file is invalid, the system will give a prompt about this error as follow:

Then the system will ask the user whether to import the License or not:

If you choose <No>, the starting process will be terminated; if you choose <Yes>, a window for choosing the License file will appear.

Select the License file you have been authorized, and click the <Import> button, then the License file will be imported automatically into the system.

Method 2: Take starting of the License Admin program for example.

Click the [Start\Program\Raisecom NView\ LicenseManager \Start License Admin] in Start menu of Windows, follow the guide to import valid license. For the procedure of this method is utmost the same to the preceding one, so more description on this will not be included.

3. How can I update my license?

When update your license file for new authority, you should:

- ◇ Send back your current license, and confirm with our salesman for new demands.
- ◇ Perform the update operation after getting the new license.

To do so, do the following:

Click the [Start\Program\Raisecom NView\ LicenseManager \Start License Admin] in Start menu of Windows to open the License Admin program.

From the NView Node Register window, press the  (Update License) key to open the Import dialog box, and select desired license file to import into system.

Then you can press the  (Show License Info) key to view the information of newly imported license file.

Thus, you have successfully updated your license file.
